

# Dry Trap Tundish

## hotun Dry Trap Tundish

---

15mm x 22mm hotun Dry Trap Tundish

# 15mm x 22mm hotun Dry Trap Tundish

## Description

The revolutionary hotun dry trap tundish allows the Temperature & Pressure relief valve to connect directly to the internal waste or soil pipe eliminating the need for external discharge. The non-return valve within the hotun Hiflo dry trap Tundish stops any foul odours from entering up through the Tundish and back into the building. The hotun dry trap tundish allows for easy identification of the historical PRV discharge by touch without the need to dismantle the connection. The hotun has been approved for use by several big-name boiler and water heater manufacturers and with its 10 year guarantee it is the perfect solution to any hot water system.

## Hotun Shield

Please note the hotun shield is not suitable for use on the hotun dry trap tundish.
